Displaying the Non-Digital Look

Guess what's in this little case. Small cigars? Or a diary? Yes, kind of. The ICY BOX IB-283 is a portable enclosure for a 2.5" SATA hard disk drive. You can carry up to some hundred gigabytes of notes or data like music and movies between its leatherette topside and chrome-plated bottom. Have a closer look and open the closure. A USB plug is integrated in the clip. The speed peculiar to USB, obtains a further meaning as you don't have to look for a cable when you are going to connect the HDD to a computer. The inner case of light metal protects the HDD. Then the IB-283 is a lot more than just look.
